

## Gluten Feed Pellets

---

### Description

It's a product of corn wet milling.

It's composed by rests of endosperm enriched with mashing water concentrated and cereal fiber.

### Presentation

In bulk.

Dry pellets of approx 25x10 mm, color chestnut brown.

### Specifications

Protein (%)	18.0 – 22.0
Dry Matter (%)	87.0 – 90.0
PB by pass (%)	25.0 (max)
FDN (%)	37.0 – 39.0
Starch (%)	12.0 – 16.0
Calcium (%)	0.04 – 0.07
FDA (%)	10.0 – 11.0
Phosphorus (%)	0.44 – 01.0
Lignin	2.00 (max)
Ether Extract	2.00 – 03.5
Digestibility (%) Rum	74.0 – 78.0

### Properties and Applications

Gluten Feed Pellet allows a main complementary as only element of kind energy protein of high biological value.

Its main application is in bovine animals feed (for milk and meat) and anticipated weaning, in mixed portions.

### Shelf life

Stored in optimal conditions it has high resistance, however it's recommended use before 6 months.
